

Outdoor Color Changing Volcano Activity

Explode. Color change. Wow! "Let's do it again, mommy", your kids say as they watch the magic of a color changing volcano unfold.

Most kids have seen and participated in traditional volcano eruption kids activities but most haven't seen a color changing volcano activity. It's so easy to take two colors and let the volcano change to the mixed colors.

What you'll need

- Vinegar
- Plastic cup
- Baking soda

Steps

1. Gather all the supplies
2. Fill the cup 2/3 full with water
3. Add 4 tablespoons baking soda, 1 color of paint/coloring and 1 teaspoon dish soap. Stir.
4. Let your kids pour in the vinegar into the cup
5. When the eruption is over. Add in the other color to the cup. Add more vinegar and watch it change color.

Kids will learn about:

Sensory
Colour Recognition
Creativity
