

Sponge Water Transfer

Can you transfer the water with the help of a sponge? The sponge will soak up the water, your child can squeeze it out to turn it into water again. Magic!

When the weather is warm, this is a good activity to keep the kids entertained with little setup and low cost. You only need water, bowls and sponges to keep your kids entertained in the summer. They transfer water from one bowl to the next.

This is a great activity for strengthening the muscles of your kid's hands and fingers, and it is also a good way to cool off on a warm day.

What you'll need

- Bowls
- Water
- Sponges

Steps

1. Gather all the supplies
2. Cut the sponge in half
3. Fill the bowls with water
4. Show your kids how to transfer water from one bowl to another with the sponge

Kids will learn about:

Sensory
Hand-eye Coordination
Fine Motor Skills
