

Velcro Blending

I like this activity because you get to make a fun educational toy for your kids and you only need a few supplies to make it. This activity teaches your child the basics of reading by getting to know sight words.

What you'll need

- Permanent Marker
- Velcro
- Paper Plates

Steps

1. Gather all the supplies
2. Choose a few sight words to work on. 3 letter words are best.
3. Write each sight word on a paper plate, leaving out the first letter
4. Write the beginning letters of each word on 1 piece of front Velcro
5. Stick a dot of velcro on the paper plate where the first letter would be.
6. Show your kids how to play

Kids will learn about:

Literacy
